On the Subject of Not Green Arrows
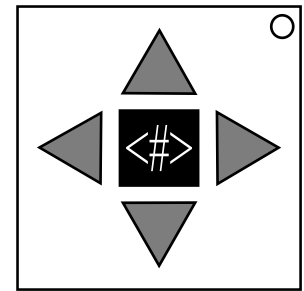

What's your points?

On the module are 4 directional buttons, and a small screen in the middle.

If the buttons are not Green, or the screen is not showing three letters, you're looking at a different module.

First, look at the table in the second page. Check all conditions listed, and keep track of the number of true conditions assigned to each of the four buttons.

Then, based on the Action Priority List below, perform the first action that applies to disarm the module. Pressing an incorrect button will register a strike, and generate 3 new letters.

Action Priority List

If all buttons have the same number of true conditions, press any button.

Otherwise, if three buttons have the same number of true conditions, press the one that doesn't.

Otherwise, if there are two pairs of buttons with the same number of true conditions present, press either button of the higher pair.

Otherwise, if there is one pair of buttons with the same number of true conditions presents, press the one with the most false conditions and is not part of the pair.

Otherwise, if the numbers of true conditions of all four buttons are consecutive, press the one with the lowest number of true conditions.

Otherwise, if the numbers of true conditions of three buttons are consecutive, press the one that isn't.

Otherwise, press the one with the highest number of true conditions.

UP	DOWN
- The first letter is a vowel. - The sum of their alphanumerical positions is a prime number. - There are no duplicate letters. - The second letter is present in the Serial Number. - "U" is present. - "P" is absent. - The third letter comes before the second letter alphabetically. - The first letter is not "R". - An indicator starting with "S" is present on the bomb.	- The second letter is a vowel. - The sum of their alphanumerical position is divisible by its digital root. - The first and second letter matches. - None of the letters are present in the Serial Number. - "D" is present. - "W" is absent. - The second letter comes before the first letter alphabetically. - The first letter is not "V". - An indicator starting with "F" is present on the bomb.

LEFT	RIGHT
- None of the letters are vowels. - The sum of their alphanumerical positions is an odd number. - The first and third letter matches. - The third letter is present in the Serial Number. - "L" is present. - "F" is absent. - The first letter comes before the second letter alphabetically. - The first letter is not "O". - An indicator starting with "C" is present on the bomb.	- The third letter is a vowel. - The sum of their alphanumerical position is a multiple of 7. - The second and third letter matches. - The first letter is present in the Serial Number. - "R" is present. - "G" is absent. - The first letter comes before the third letter alphabetically. - The first letter is not "Z". - An indicator starting with "N" is present on the bomb.
